

Factory Production Control

Control and improve the production process in the precast plant

Streamline and manage your workflow with one click

- + **Avoid failures** by real-time monitoring the process
- + **Reduce downtime** by controlling every step
- + **Enhance production capacity** with continuous and automated monitoring for every product

For more information,
visit our website.

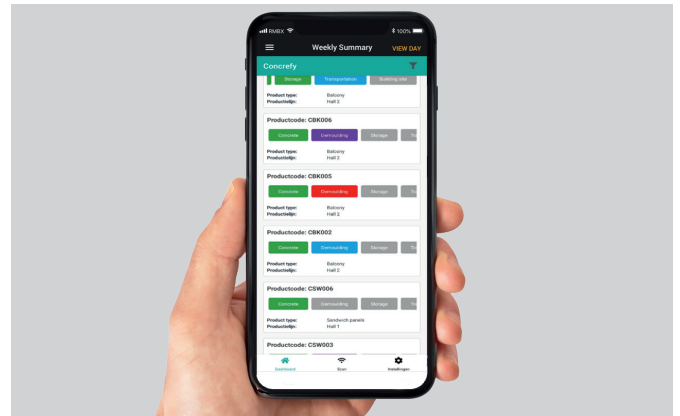

Our solution

- + Production progress can be viewed from anywhere: Desktop, app (mobile/tablet)
- + Monitoring of production progress with automated error analysis
- + Real-time data for analysis and optimisation of the ongoing production

Your benefits

- + Errors are reported back immediately
- + Incentive for employees to record correctly
- + Signalling of process progress
- + Product information/registration always at hand

Production line	All	Product type	All							
CBK001				Mold	Rebar	Concrete	Demoulding	Storage	Transportation	Building site
CBK006				Mold	Rebar	Concrete	Demoulding	Storage	Transportation	Building site
CBK005				Mold	Rebar	Concrete	Demoulding	Storage	Transportation	Building site
CBK002				Mold	Rebar	Concrete	Demoulding	Storage	Transportation	Building site
CSW006				Mold	Rebar	Concrete	Demoulding	Storage	Transportation	Building site
CSW003				Mold	Rebar	Concrete	Demoulding	Storage	Transportation	Building site

Precast Value Engineering: Maximise your efficiency and benefit from the synergy of all our digital solutions

- + Quickscan - On-site analysis to identify potentials in the precast process
- + Concremote for Prefab - Monitoring of concrete temperature and compressive strength with LoRa technology
- + myConcrefy - Dashboard - View, retrieve and analyse all data of our digital solutions on one platform
